FICTIONAL SAMPLE RECORD - NOT A REAL PATIENT

RIVERSIDE CHILDREN'S HOSPITAL - INPATIENT PSYCHIATRY
PSYCHIATRIC EVALUATION

Patient: Jordan Avery (fictional) DOB: 05/14/2011
Date of Evaluation: 09/18/2023
Evaluator: Dr. Helen Marsh, MD (fictional)

REASON FOR REFERRAL
Jordan is a 12-year-old male brought to the emergency department by his foster mother on 09/16/2023 after stating at school that he "wanted to die" and attempting to tie a shoelace around his neck in the school bathroom. He was admitted to the inpatient unit for safety.

HISTORY OF PRESENT ILLNESS
Over the past two months Jordan's foster mother reports increasing irritability, difficulty falling asleep (often awake until 2 a.m.), and three physical fights at school. He reports nightmares about his biological father two to three times per week. Symptoms worsened after a supervised visit with his father was cancelled in August 2023.

PAST PSYCHIATRIC HISTORY
Jordan was diagnosed with Attention-Deficit/Hyperactivity Disorder, combined type, at age 7 by his pediatrician. He received outpatient therapy at a community clinic from 2019 to 2022. This is his first psychiatric hospitalization. No prior suicide attempts were reported.

MEDICATION HISTORY
Methylphenidate (Ritalin) 10 mg twice daily was started in 2018 and stopped in 2019 because of poor appetite and weight loss. Guanfacine 1 mg at bedtime was started in 2021 with partial benefit for hyperactivity. Current medication on admission: guanfacine 1 mg at bedtime. No known drug allergies.

DEVELOPMENTAL HISTORY
Per foster care records, Jordan was born full-term with no complications. Milestones were reported as delayed for speech; he received Early Intervention speech therapy at age 2.

SOCIAL AND PLACEMENT HISTORY
Jordan was removed from his biological mother's care by ACS in March 2019 due to neglect. He has lived in two foster homes and has been with his current foster mother since 2021. He has one younger sister, age 8, placed in a separate foster home; they visit monthly.

TRAUMA HISTORY
Jordan witnessed domestic violence between his biological parents before age 6. Records note a substantiated report of physical abuse by his biological father in 2018.

FAMILY HISTORY
Biological mother has a reported history of bipolar disorder and opioid use disorder.
Biological father is currently incarcerated. Maternal uncle died by suicide.

SUBSTANCE USE
Jordan denies any alcohol, cannabis, vaping or other drug use.

DIAGNOSTIC IMPRESSION
Post-traumatic stress disorder; ADHD, combined type; rule out major depressive disorder.

STRENGTHS
Jordan enjoys drawing and basketball and has a warm relationship with his foster mother.
